

FictStream Audience Behavior Analysis 2025

Viewer Engagement Patterns

Peak viewing hours: 7PM-11PM local time across all regions. Mobile viewing accounts for 58% of total watch minutes, up from 51% in 2024. Average session length: 47 minutes. Users watching on TV have 23% higher completion rates.

Demographic Insights

18-24 demographic: highest binge-watching rate (3.2 episodes per session), lowest subscription retention (62% 12-month retention). 25-34 demographic: highest LTV, strongest drama and Sci-Fi affinity. 35-44 demographic: most likely to recommend to friends, highest premium tier rate (34%). 55+ demographic: fastest growing segment, +18% YoY, strong drama and mystery preference.

Genre Preference by Region

North region: Drama (38%), Sci-Fi (28%), Mystery (18%). South region: Action (35%), Drama (30%), Comedy (20%). East region: Sci-Fi (42%), Thriller (25%), Romance (18%). West region: Thriller (33%), Action (28%), Sci-Fi (22%). Central region: Drama (40%), Romance (25%), Action (20%).

Churn Analysis

Main churn drivers: content gaps between releases (42%), price sensitivity (31%), technical issues (14%), content quality concerns (13%). Titles with completion rate >80% reduce churn by 18% in the 30 days post-watch. Comedy genre has highest churn correlation: users who only watch comedy are 2.3x more likely to churn.

Recommendation Engine Impact

Personalized recommendations drive 67% of all watch starts. Cold-start problem: new users take avg 4.2 sessions to receive high-quality recommendations. Genre diversity in recommendations reduces churn by 9% versus single-genre recommendation. Stellar Run success partially attributable to recommendation engine surfacing it to Sci-Fi finishers.
